## DETAILED ACTION

### Claim Objections

1. With respect to dependent claim 9, there is no antecedent basis for “the bottom row” and --a lower row-- would better describe the arrangement of multiple rows.

### Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1 and 10 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Beratan *et al.* (US005638599A).

With respect to independent claim 1, Beratan *et al.* discloses a radiation detector 30 (Fig. 6) comprising an absorbent membrane 34 fixed in suspension onto a front face of a substrate 44 in a direction parallel with the substrate and a support means 36 thermally insulating the membrane 34 from the substrate 44 (column 5, lines 58-60). The support means 36 comprise at least one alveolate structure 64 arranged substantially perpendicularly to the front face of the substrate 44 and to the plane of the membrane 34.

With respect to dependent claim 10, the alveolate structure 64 in the radiation detector of Beratan *et al.* comprises a porous pad (column 6, lines 55-59).

### Response to Submission(s)

4. The amendment filed October 3, 2005 has been entered. Attention is directed to the change of title.

5. This application has been published as FR 2854277 A on October 29, 2004, WO 2004/097355 A1 on November 11, 2004, and again as US 2006/0273256A1 on December 7, 2006.

**Allowable Subject Matter**

6. Claims 2-9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

7. The following is a statement of reasons for the indication of allowable subject matter: the xerogel mesas of Beratan *et al.* do not suggest structures of the type recited.

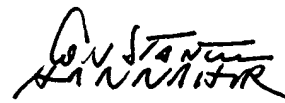

**Conclusion**
